This amazing treatment utilises the latest technology in ultrasound cavitation and cryolipolysis (fat freezing), widely recognised as two of the most effective cellulite reduction and fat loss treatments around.

The treatment provides better results than other treatments on the market using diode laser. These treatments have amazing and instant results when used with exercise, and are ideal for those wanting to address problem areas with a non-invasive alternative to liposuction.

*"The treatment was completely painless and I was amazed to see real results - it gave me the boost I needed."*
